PROFILE

I am a dedicated, optimistic and ambitious individual who is pursuing his goal of becoming a well known Developer recognised by a vast community.

When given a task I always strive to give every effort I have to achieve my targets and go beyond the expected in order to provide a better product.

Teamwork and presentation are key aspects I always attempt to demonstrate within the workplace as I personally believe these are vital within any industry.

EXPERIENCE

WiFiSpark, Exeter— Web UX Application Developer

July 2018 - Present

Responsibilities:

- Develop WiFi portals for a variety of clients using my knowledge of Front-end web development skills (HTML,CSS/SASS/Bootstrap, JQuery, JavaScript, PHP and more).
- Peer review other developers portals highlighting noticeable bugs before moving them forward into the official testing stage.
- Develop an online media streaming service (Similar to BBC iPlayer).
- Setup and manage a variety of portal URLs through AWS services.
- Working on a Linux setup, manage portals through CLI version control and virtual CentOS machines.

Landmark Information Group, Exeter— *Developer Intern*

June 2016 - September 2017 Responsibilities:

- Develop web applications in an MVC coding standard coding in the C# programming language.
- Debugging my code and working through the logic to find errors and figure out a method to fixing them.
- Create BDD (Behaviour-Driven Development) tests for my code using tools such as Selenium to visualize and simulate certain actions within the tests.
- Through SCRUM methodology take tickets off of the backlog to work on as a feature on a new branch, then merge and deploy the new additions to the main develop branch (Using JIRA & SourceTree).
- Interview experience, I was designated the role of interviewing **Technical Skills**

.NET C# Development

Web Development Experience

- Level 3 BTEC Extended Diploma in IT (Final Grade: Distinction* Distinction*, Distinction*).

Trinity School, Teignmouth— *GCSE's*

September 2010 - June 2012

- 10 GCSEs A-C, including Maths, English, Science, Religious Education, Information Technology, History, Geography and Design Technology

PROJECTS

This Is My Stop! — *A 3rd person local multiplayer beat em' up*

Final Year Project:

To give a short summary of the project I would describe 'This Is My Stop!' to be heavily inspired by the cult classic film 'The Warriors' thematically as one random team is selected to escape in a hunt / escape gamemode.

Up to 4 players can play, each player takes on the role of a gang leader (With AI gang members following them around) with the aim to take down the escaping team but can intervene or work with other gangs to turn the tide, meanwhile the escaping gang has the goal of reaching their subway car to make it back home.

LANGUAGES

English (Native)

Arabic (Beginner)

work.

Passionate Programmer: Always seeking opportunities to learn more about programming (Examples of such are found on my [Twitter](#) or when I livestream my development work on

[Twitch](#)).

Charity / Volunteer work

Plymouth University, Course

Representative: Within this role course reps would hold meetings to discuss various issues within the computing department of the University and look at ways to further improve the course for students. **Michelmores 5k Charity Run:**

I participated in the Michelmores 5K charity run which is a local charity focused on supporting bereaved children and their families within the Exeter area.

Teignmouth Live Saving Surf

Club: I was a member of Teignmouth Life Save Surf Club during 2013/2014 training for fitness and as a lifeguard.

Children's Hospice South

West: In 2012 I completed the Fire Walk in Teignmouth to raise money for the Children's Hospice South West and had managed to raise up to £140 after walking on the hot coals.

Help for Heroes: Before leaving Trinity School I personally organised and took part in a Triathlon with two other students at school to raise money for Help for Heroes and received a certificate from the charity for my efforts.
